Title: METHOD FOR REDUCING FLUORESCENCE QUENCHING IN BIOASSAYS

REPLY

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the office action dated March 27, 2002, please amend the above-identified application as follows:

IN THE CLAIMS:

Please amend claims 1-19 as follows:

1. (Amended) A process for reducing a fluorescence quenching caused by a measuring medium, in a fluorescence assay for an analyte using at least one fluorescent label, comprising introducing a fluorescent conjugate comprising an oligonucleotide bonded to a rare-earth metal cryptate into the measuring medium.
2. (Amended) The process as claimed in claim 1, wherein the oligonucleotide consists of a chain of ribonucleotide or deoxyribonucleotide units bonded to one another via phosphodiester bonds.
3. (Amended) The process as claimed in claim 1, wherein the oligonucleotide consists of
